## Los Angeles District, U.S. Army Corps of Engineers

Future developments should proceed only after potential negative impacts to water quality have been addressed and mitigation plans developed. Privatization, small-seed intensification, and the origins of pottery in the western Great Basin. The evidence presented by Di Peso et al.

**Text of S. 3710 (90th): An Act authorizing the construction, repair, and preservation of certain public works on ... (Passed Congress version)**

Ed Jelks was appointed as the director of TASP and was responsible for the Amistad salvage work, as well as that at other Texas reservoirs. On December 5, 1980, President Carter signed the Pacific Northwest Electric Power Planning and Conservation Act into law as Public Law 96-501. Specifically, the review made recommendations in four areas: contract procurement, contract administration, program planning and, monitoring and evaluation.

## Residential Mobility and Ceramic Exchange: Ethnography and Archaeological Implications

Likewise, it was becoming apparent that for the Amistad region it would be the many dry caves that would provide the most important scientific information about the paleoenvironment past changes in climatic conditions and how those changes affected the long sequence of prehistoric human life.

## Los Angeles District, U.S. Army Corps of Engineers

Routes B-1 and B-2, the Twin Hills Reservoir, and the Bopp Road sump site were determined to be the best choices because they would have fewer impacts on the cultural resource base.

## Purcellville, VA

The quest for subsistence efficiency and civilization in the Sonoran Desert. Parsons and Peterson discovered and tested Mosquito and Zopilote

Caves and certain others while scouting ahead for suitable rockshelters for the excavation crew to turn to after finishing work at Coontail Spin. In 1937, a truly gifted commercial draftsman and amateur archeologist, Forrest Kirkland of Dallas, began to carefully document the remarkable pictographs painted images present in the Lower Pecos Canyonlands.

#### **Environmental Contaminants Mapper: [Home](#)**

. They alleged that Congress could avoid the uncertainties accompanying administrative allocation by devising a legislative allocation scheme and equipping Bonneville with the authority to purchase power from non-federal sources on a long term basis.

#### **Environmental Contaminants Mapper: [Home](#)**

Power system cost management: Initiate a cost management strategy involving Bonneville, the Corps of Engineers and Bureau of Reclamation, which operate the federal dams.
