Smart Cities for Sustainable Development

Such partnerships will help develop baseline conditions and experiment with future development scenarios to guide urban development and management in keeping with SDG 11.

The New Urban Agenda: Key Commitments

Transit oriented development is ideal for more persons living in areas with compact urban form and should be promoted. Currently, urban streets are not pedestrian friendly and there is limited walkability in urban centers. It also clearly links to , which aims to: ... make cities and human settlements inclusive, safe, resilient and sustainable.

Sustainable Development Goals

The global goals in Africa Besides the 2030 Agenda, African countries have committed to implement the African Union Agenda 2063, which is both a vision and a plan to build a more prosperous Africa in 50 years. This contributed to urban sprawl and weakened the country's food security. Conversely, urban agriculture has shown mixed reviews in the developed world.

ISO

For instance, Rizhao, China has become a solar-powered city; in its central districts, 99% of households already use solar water heaters. Compact urban form is considered suitable because it promotes high residential density with mixed land uses where residents can have access to economic, social, and cultural activities without traveling long distances as often happens where urban sprawl occurs. Check some of the involved cities below.

SDG 11: Make cities and human settlements inclusive, safe, resilient and sustainable

Despite the negative reputation and the many hurdles that must be overcome, urban agriculture offers a promising solution for sustainable development.
