## ECONOMIC POLICY: THOUGHTS FOR TODAY AND TOMORROW, by Ludwig von Mises

But we also know that many of the hopes of the eighteenth century philosophers have been badly shattered—hopes that there would not be any more wars and that revolutions would become unnecessary. It is a very good text for undergraduates studying economic policy, and for anyone who wants to gain a fundamental understanding of the interaction between market forces and government intervention. But one must not forget that, in England, conditions are very different from conditions in Russia.

### Economic Policy Thoughts for Today and Tomorrow

It has made possible an unprecedented increase in world population. Freedom means something only within the framework of society. There is something else that should be mentioned.

## ECONOMIC POLICY: THOUGHTS FOR TODAY AND TOMORROW, by Ludwig von Mises

Ludwig von Mises spoke without any restraint about capitalism, socialism, interventionism, communism, fascism, economic policy and the dangers of dictatorship. People who believe there is such a mythical system can become really poetic when they praise the glories of interventionism.

The first famous example is the case of the Roman Emperor Diocletian, very well-known as the last of those Roman emperors who persecuted the Christians.

### Economic Policy: Thoughts for Today and Tomorrow by Ludwig Von Mises

On August 1, 1914, the value of the dollar was four marks and twenty pfennigs. The inflow would reduce wages in the United States, and raise them in other countries.

That is what we are now witnessing—a society that is based on the system of slavery and other forms of industrial capitalism. But this fact alone does not change the character of our economic system.

**ECONOMIC POLICY**

From this point of view, many regarded the discussions in the election campaigns and later in the legislative assemblies as an important political factor. You cannot make laboratory experiments in the field of human action because a scientific experiment requires that you do the same thing under various conditions, or that you maintain the same conditions, changing perhaps only one factor. The same is true for other countries which depend on the importation of food and raw materials and therefore have to export manufactured goods.
