The Herball or Generall History of Plantes by Gerard

Dioscorides is southern European Mediterranean and the northern Europeans had different plants available but in Period, the science didn't understand regional differences in plants as far as I can tell.

Beyond Home Remedy: Women, Medicine, and Science

Hope you will like it and give your comments and suggestions.

Scotch mint and spearmint. A comparative study of cultural, morphological, and histological characteristics of species of *Mentha* growing in florida. III

This is partly because no book on flowers or trees can be written without quotations from his glowing pages, but mainly because the work has won an unchallenged place of honour as the most delightful, fragrant, and refreshing of all old-time herbals, as it is by far the most amusing.

Scotch mint and spearmint. A comparative study of cultural, morphological, and histological characteristics of species of *Mentha* growing in florida. III

All manner of Dates whatsoever are hard of digestion, and cause head-ache: the worse sort be those that be dry and binding, as the Egyptian Dates; but the soft, moist, and sweet ones are lesse hurtfull. Beige pictorial dust jacket over green cloth.
