What parenthood? : ethics and assisted reproduction (Book, 1992) [metrics.learnindialearn.in]

Lauritzen's own experience with infertility is both a window to the larger social, legal, and political questions at hand, and a benchmark against which claims about the effects of technology on human reproduction are judged.

Assisted Reproduction and the Pursuit of Parenthood: Introducing our New Book

She has worked on the ethics of emerging neuroenhancement technology research and clinical trials. Discuss key issues related to the ownership and use of human tissue and its underlying genetic information.

Religious Perspectives on Assisted Reproductive Technology

Actually, their luck likely derived from the fact that they lived in Illinois, which a few years earlier had become just the fifth state in the nation to require that employers offer comprehensive coverage for infertility treatment, including IVF. Existential phenomenological alternative for psychology. In New York, licensed semen banks are required to supply relevant nonidentifying information about donors to facilities that perform assisted reproductive procedures with donor semen.

Bioethics: The Law, Medicine, and Ethics of Reproductive Technologies and Genetics

Reporting of outcomes will be most effective if it is mandatory and conducted on a national level. Her action has no victim and therefore sets back no one's interests. A mother cannot give agreement to a parental order less than six weeks after the birth of the child.

Assisted Reproduction

In 1994 she also received her recognition as a specialist in gynaecology and obstetrics.
