### Retraining and reskilling workers in the age of automation

THE DIRECT-CARE WORKFORCE 227 Broadening the Labor Pool While improving the quality of direct-care occupations is important to the recruitment and retention of this workforce, sources for new workers also need to be considered, especially the possibility of recruiting workers from other, currently underutilized sources.

### 5 The Direct

Problem solving In addition to literacy and numeracy skills, which can be specified relatively easily, another key job requirement is general cognitive skills.

### Retraining and reskilling workers in the age of automation

Long-term care for the elderly with disabilities: Current policy, emerging trends, and implications for the twenty-first century.

### WorkforceGPS

The need for direct-care workers is expected to increase in the coming decades, mainly because of the aging of the population but also because the number of females aged 25 to 54—the typical direct-care worker demographic—is projected to remain flat PHI, 2001. THE DIRECT-CARE WORKFORCE 239 PHI.

### 5 The Direct

The Washington Post, October 14, A07. Reducing the risk of burnout in end-of-life care settings: The role of daily spiritual experiences and training. According to an assessment of this program, the grants were shown to decrease worker turnover and increase retention rates.
