William was happy to help James into exile and suggested he relocate to , just outside London. AU 869, 870, 872, 877, 879, 883, 884, 912 etc.

The Federalist Papers, by Alexander Hamilton, John Jay, and James Madison

The fleet changed course to the south, however, when the wind turned more to the north; it has been suggested that the initial move to the north was a feint and indeed James diverted some of his forces in that direction. As the former of these comes first in order, it is proper it should be the first discussed. This idea admits not of precise demonstration, because there is no rule by which we can measure the momentum of civil power necessary to the government of any given number of individuals; but when we consider that the island of Britain, nearly commensurate with each of the supposed confederacies, contains about eight millions of people, and when we reflect upon the degree of authority required to direct the passions of so large a society to the public good, we shall see no reason to doubt that the like portion of power would be sufficient to perform the same task in a society far more numerous.

The genius of the people will ill brook the inquisitive and peremptory spirit of excise laws.

Sidney, Filmer & Locke on Monarchical Power

This need not further be called a free City. They, of course, would hardly remain long indifferent to that decided mastery, of which experience has shown us to be possessed in this valuable branch of traffic, and by which we are able to undersell those nations in their own markets. The jurists and the other learned classes, cleric and lay, were unrestrained by local boundaries and travelled freely to practise their craft where they wished, and for them, a highly self-aware and deeply respected élite, the whole island of Ireland was the field of their labours.

Sidney, Filmer & Locke on Monarchical Power

As a ship owner he may have shipped the timber to England or Ireland in his own vessels. But Connecticut gave strong indications of dissatisfaction with that determination; nor did she appear to be entirely resigned to it, till, by negotiation and management, something like an equivalent was found for the loss she supposed herself to have sustained. They who promote the idea of substituting a number of distinct confederacies in the room of the plan of the convention, seem clearly to foresee that the rejection of it would put the continuance of the Union in the utmost jeopardy.
