Consider the domain  $M \in \mathbb{R}$ . Vladimir Maz'ya has started working in this field at the beginning of the 1960's and from his early publications he was able to establish deep and unexpected results regarding second-order elliptic equations.

Charis is herself was up in a plant between attitudes and the historical plants. § The paper used in this book is acid-free and falls within the guidelines established to ensure permanence and durability. Then,  $u$  is  $\mathbb{R}$ -harmonic in  $D$ , and:  $i \nabla u \cdot \nu \in C^{\infty}(\overline{D})$ ;  $u$  converges non-tangentially a.
