## **Kandungan RSIA Anugerah Medical Centre Kota Metro Tahun 2015**

Here, we focus on the impact of the shift in TKA procedures, which account for about two-thirds of all TJRs. Given this uncertainty, it would be wise to conduct a formal evaluation of effectiveness locally for any new case management program.

### **Outpatient Case Management for Adults With Medical Illness and Complex Care Needs**

Because of their role as end-users, individuals are invited to serve as Key Informants and those who present with potential conflicts may be retained. TKA is anticipated to become an increasing portion of total TJRs due to greater projected growth than THA.

#### **Consultants**

Kimberly Barry, BSN, MS, RN, CMAC, is a consulting associate.
