The SEC just mandated human capital disclosure: What does this mean for you?

While the main purpose of a skills

inventory might not be measuring human capital, having a database of the information can certainly help you! Banks will need to enhance resilience across capital, technology, and talent, as they confront potential new challenges in the short term. Do we have employees that are living below the poverty line? We propose starting with a framework and some guiding principles. Banks can play a leadership role in driving the sustainable finance agenda but will need to engage with other institutions to solve the many problems in this area.

Human capital governance: The beginning of a new era

Ultimately, the impacts of climate risk are not just social or reputational, but financial as well. No companies in the three sectors commented about the number of product categories purchased per customer or the expected life of a customer.

CORPORATE REPORTING DIALOGUE

Appropriate controls and processes will need to be maintained, especially when it comes to the underlying data. You can also use the guidance on actions and expectations for the conduct of organisations provided in ISO 26000 to disclose relevant sustainability topics in the annual report. The list included items such as the product or service offered, seasonality of the business, source of raw materials and competitive conditions, but only one item related to human capital: the number of employees.

New human capital disclosure rules: Getting your company ready

Valuing your Talent, led by the CIPD, developed a simple framework that illustrates the different types of data HR professionals can collect to understand human capital.

CORPORATE REPORTING DIALOGUE

And third, advanced technology is expected to be at the heart of everything banks do. In other words, if it is important, you had better disclose it publicly.

Human capital governance: The beginning of a new era

The new age of transparency for both employees and investors is now upon us. The main users of the information collected and scores given by CDP are institutional investors, purchasing organisations and policymakers.

Human capital governance: The beginning of a new era

Now that you know why you need to measure human capital, make sure you have all the right steps to! Our survey of 200 global banking executives revealed that this challenge is particularly acute in Europe, where almost 60% of survey respondents indicated that employee fears of returning to work will hamper their ability to succeed after the pandemic. Pushing financial planning and analysis processes into business units should improve granularity and accuracy. This is a challenge the VMRC is taking up in developing a framework of principles and criteria that characterizes value measurement and reporting worldwide.

9 Tips for Using HR Metrics Strategically

That, in turn, can help you look for ways to address whatever dynamic is nudging those employees toward the door. Trust me, they will start caring about data accuracy like never before because the last thing they want is to have to make a public retraction or apology for incorrect data.
