Wage norms in an open economy

Program in Political Science of the City University of New York, located in the Graduate School and University Center of the City University of New York at 365 Fifth Avenue in New York, consists of a community of scholars dedicated to the tasks of acquiring, expanding, and transmitting reliable knowledge about political phenomena. Dieser Aufsatz zeigt, daß beide Arten der Einkommenspolitik äquivalent sind.

Wage norms in an open economy

Opinions, findings, or conclusions expressed in the journal are those of the authors and do not necessarily reflect the views of the editors or the City University of New York. Since a wage increase for one group of workers negatively affects the welfare of other workers who are complements in production, centralized wage setters choose wages below the equilibrium of decentralized wage setting.

In addition, centralized bargaining is associated with relatively small wage differentials. The central assumption is that the centralization of wage setting at the national level unites unions who are complements in production. Such developments are reflected in the content of industrial relations research.
