The Art of Heraldry

The Heraldic Artist

Though primarily self taught as an artist, Judson has studied glass painting with several masters in this obscure trade and continues to further his education. The bulk of his work so far consists of several hundred private commissions worldwide, but the most influential pieces in his portfolio were the new states arms and flag for his country, commissioned by the government of Serbia. This house has now existed for nearly a quarter of a century, and its proprietors have paid much attention to the production of ornamental coloured glass, that it may be affirmed, without prejudice to other manufacturers in localities where such business is now carried on, that the Manchester glass is in no way inferior to the best in the country.
