WinWorld: Windows NT 4.0 Patches

Robot supports Windows XP running on computers with a 32-bit architecture. Microsoft has focused its efforts on integrating its Web browser and on the development of its Java Virtual Machine. Therefore, Robot cannot record or play back against a Java application that is running in debug mode.

Rational® Testing Products Release Notes

For this reason, if your Solaris systems share binary or library directories, or both, over NFS file systems, it is recommended that you shut down and restart the systems rather than reexecute them. Most of the software at that time still ran under DOS, which made consistent Windows NT development unattractive.

WinWorld: Windows NT 4.0 4.0

NT can communicate with many different types of computers. SP-2 and SP-3 are the supported service packs. Unless otherwise noted, archive-only downloads are for i386 CPU systems.

Smalltalk/X Architecture specific features

A major update dubbed followed in 1992 with the brand new red-green-blue-yellow Windows logo resembling a flag.
