## Open markup on H.R. 8631 and S. 2568 :

The issues related to PA re-authorization are legally complex and technical. Joint Committee on Atomic Energy. Given the major role DOE is expected to play in the management of commercial SNF over the next 50 - 100 years and the extensive clean-up and management activities at DOE sites around the country, continued coverage of DOE and DOE contractor activities under PA must be a cornerstone of any renewal of the Act.

Some method of automatically adjusting the cap from year to year or at certain predefined intervals to take account of inflation and other factors that might influence the upper limit of necessary coverage would assure that the statutory limit continues to be adequate. Advances in information technology and in the field of epidemiology permit the establishment of causal linkages that are more readily available and scientifically justifiable. Under the current provisions of the Act, coverage for transportation accidents will end if the radioactive material is stolen and later released.
