The Aeneid Book IV Summary and Analysis

A Trojan, follower of Aeneas, 1. During the night, two of the Trojans try to escape and tell Aeneas what has happened, but they are killed.

Book X

Evander admits, however, that he can't give them too much help so he sends them further upstream to a tribe of Tuscans who have a grudge against some of the Latins. Even as bees in early summer, amid flowery fields, ply their task in sunshine, when they lead forth the full-grown young of their race, or pack the fluid honey and strain their cells to bursting with sweet nectar, or receive the burdens of incomers, or in martial array drive from their folds the drones, a lazy herd; all aglow is the work and the fragrant honey is sweet with thyme.

Fate Theme in The Aeneid

Hector's ghost appears to Aeneas in Book II on the night Troy is invaded by the Greeks and warns the Trojan prince to flee the stricken city. The shades flock to the river, and Charon ferries across those who have been buried, leaving the others to wait for a hundred years.

The Aeneid Summary

In the midst of the joyful scene Juno sends a storm, and Dido and Aeneas shelter in the same cave. As Calybe, Allecto urges Turnus not to permit the Trojans to take control over the city, and tells him to raise his men in arms against the foreigners.
