Evaluation of Land Degradation and So

Flood recession agriculture along the banks of the seasonally flooded rivers is certainly more reliable than rain-fed shifting cultivation.

Evaluation of Land Degradation and So

Agriculture & Soil Degradation — The Conscious Challenge

Albany: State University of New York Press.

Extreme Wildlife Declines and Concurrent Increase in Livestock Numbers in Kenya: What Are the Causes?

For most countries, land dedicated to cropland is typically below 20 percent, with many countries dedicating less than 10 percent. On the basis of above ratio i. This occurs in two ways.

Climate change and livestock: Impacts, adaptation, and mitigation

This necessitates more investment by international agencies and national governments for supporting the relevant integrated research and sustainable development efforts, with full participation of the target communities. Table 5 shows the various sources of irrigation used in agriculture. African Journal of Ecology 49: 175—188.

Extreme Wildlife Declines and Concurrent Increase in Livestock Numbers in Kenya: What Are the Causes?

The Model Act i provides for the direct selling of produce through contract farming, ii permits private persons, farmers and consumers to establish agricultural markets, iii levies a single market fee on the sale of the commodity, and iv replaces licences with registration of market agencies so that they can operate in more than one market, among other things. Table 7: Production of crops in million tonnes
