The Role of Platinum Group Metals in Modern Applications

The platinum is precipitated from solution with , and the resulting crude platinum salt is recovered by filtration and then heated to decompose it to a powdered metallic form. The one is the fuel cell on the vehicle, and the other is producing green hydrogen.

Platinum Group Metals Ltd. (NYSE:PLG) Drops

Aqua regia is most often used for this purpose. The metal is redissolved in aqua regia, then reprecipitated with ammonium chloride and calcined to pure metal.
