The HIGH

Although relapsing forms of MS as almost all autoimmune diseases are more common in women than in men, both sexes get PPMS at about the same rate.

Can Vitamin D Lower Your Risk of COVID

In other words, they think the low vitamin D was the CAUSE of the high blood calcium because the low vitamin D caused the parathyroid glands to become over-active. The levels of Vit-D1-25 were low in 0%, normal in 58.

Low Vitamin D Levels and Low Vit D in Parathyroid Disease and Hyperparathyroidism. Low Vitamin D Is Not Good For You!

Notes: -
This edition was published in January 14, 2008

Here is an abstract of this talk; the journal article was published in 2009. I also suggest taking a high dose of vitamin k2 with it as explained in my book...It helps in taking calcium out of blood and putting back in your bones But if you must use a Dr. The app is very accurate and will tell you if you have a parathyroid problem or a vitamin D problem
