## Surgical Pathology Topic Center

Limited testing is performed on a routine basis at MUSC Pathology and Laboratory Services at East Cooper and the North Charleston Specialty Clinic. As a group, we continuously strive for excellence in diagnosis, teaching, and research, and we take pride in providing the best possible care for our patients.

## Surgical Pathology < Pathology

It is the mission of the autopsy service to determine the cause of death as accurately and completely as possible. A dermatologist, for example, might remove a mole for a surgical pathologist to analyze.

## Surgical Pathology Laboratories

The faculty are involved nationally and internationally in professional societies and organizations to advance their field. Renal Pathology is a subspecialty of anatomic pathology that specializes in the diagnosis and characterization of medical diseases non-tumor of the kidneys.

## Pathology & Laboratory Medicine

Our attendings provide subspecialized consultations in all areas of surgical pathology, including bone and soft tissue; breast; cardiothoracic; dermatological; gastrointestinal and liver; genitourinary; gynecologic, perinatal, and obstetrical; head and neck; pediatric; and renal pathology.
