### Quicksand Fans

Management is our narrator and she takes us into her time before the shootings, her time in jail, her talks with her lawyers Ever sine Columbine, school shootings have seemed endemic to the United States, happening way to often, always devastating and difficult to understand. It didn't particularly flow well.

### Quicksand (TV series)

Maja Norberg, an attractive and popular teenager, is a survivor of a mass school shooting. The protagonist admits the murder at an early stage but denies the crime — the trial is rather about why the murder was committed than whether it was committed. I watched an English movie called 'The Bird with the Crystal Plumage'.

### Quicksand by Nella Larsen

The first 85% of the book is definitely 4 stars, but it was so exceptionally good that the ending is actually This is not exactly what I would call a murder mystery. Larsen's prose has a rich sensuality to it which I really enjoyed: she has a true knack for summoning textures, colors and tastes very vividly, and she painted a stunning portrait of a complicated and fascinating era. For Helga, born in an era less populated with global nomads, being the daughter of a Danish mother and a West Indian straying father seemed to be an irreconcilable and unique identity.

### Quicksand (TV series)

It's a story about failure, of many of the characters, but does failure make someone guilty? I really went back and forth on the rating, because the first 70-75% of the book was 2 stars for me, but the last 25-30% I'd say was 3.

### Quicksand (1950)

Everyone is incredibly real - from parents right to the teenagers themselves.

### What's Quicksand?

Like most people in their early twenties, Helga Crane is filled with the desire to be more than she is, to be more entranced by the world than she is, and to see something more of life than her teaching position in the rural South offers. The main character, Helga Crane, is 23 years old at the start of the novel, and doesn't progress beyond her mid-to-late-twenties until nearly the end. At that level of density, sinking beyond about waist height in quicksand is impossible.
