Paradoxes of Professionalism: Rethinking Civil

It is time for scholars and practitioners to develop a normative framework for military professionalism that is better suited to the contemporary era, focusing on the following three goals. First, as numerous studies have documented, since the 1970s, military officers have become increasingly partisan, identifying with one of the major political parties primarily the Republican Party.

The Stopping Power of Norms: Saturation Bombing, Civilian Immunity, and U.S. Attitudes toward the Laws of War

Matters were not helped by the fact that certain post-structural scholars provocatively declared themselves to be against ethics. In this case, a transnational grassroots network—the Mesoamerican Alliance of Peoples and Forests—pulled out of climate negotiations when it became clear that they would not be able to advance their agenda on territorial security within the UNFCCC. On the one hand, the political nature of cosmopolitan thought is consolidated by its shift to an ideological, or at least, paradigmatic status.

Paradoxes of Professionalism: Rethinking Civil

In short, gender and ethics produce that world. Second H3 , we found strong evidence of agreement with the civilian immunity norm among the U.

Journal of Language and Politics

It also stresses that despite the magnitude and urgency of the climate emergency, the transformation of global politics is not necessarily sudden or disruptive. Moreover, while these disputed assumptions are embedded in the story and the survey question, undisputed factual information about relevant U. In short, given the lack of discussion or testing of legal or ethical norms and a Hiroshima-like force protection scenario involving weapons of mass destruction that allows only two choices, this is the type of fictional experiment and question structure that we might least expect to showcase the stopping power of the civilian immunity norm.

INTERNATIONAL RELATIONS AND WORLD POLITICS (History)

This concept of climatization points to a powerful but uneven process of extension, translation, and social coordination, as climate change becomes the frame of reference through which other policy issues and forms of global activism are mediated and hierarchized. International Theory 3 1 : 1—36.

Political Realism

As more and more issues are framed as global problems deserving global action Neveu and Surdez , future research on the transformations of global governance should pay close attention to these processes, wherein actors compete to impose the logics of their respective domains on other domains.
