**A unique partnership between**

**Denmark and the Arab world**

Resumen: Los debates académicos y de políticas sobre la migración y las « crisis » de refugiados en todo el mundo aún no han abordado plenamente la importancia de la movilidad transfronteriza de la población para las estrategias diplomáticas de los estados.

**Migration Diplomacy in World Politics**

**Migration data in Northern Africa**

Similar examples of positive-sum approaches to regional migration cooperation can be seen in other regional fora.

**The Politics of Egyptian Migration to Libya**

The profiles also provide an overview of conflict and disaster events that triggered migration, an analysis of the drivers of internal displacement, as well as country-specific displacement patterns. In addition, it should be noted that any state's ability to effectively use diplomatic tools and processes in relation to migration processes will be dependent on other factors, such as its overall power and available resources. These, it should be clarified, are ideal types and a state may simultaneously hold the position of migration-receiving state in some bilateral relationships while holding the position of sending or transit state in others.

**Egypt: From Liberalisation to Marginalisation**

As a first cut, we suggest the utility of examining strategies within a relative and absolute gains framework. Libya agreed to reopen its labor market to Egyptian workers, and in August 1989 alone, about 70,000 Egyptians were reported to have crossed into Libya.
