#### No. 31 Land Resources of the Vanimo Area, Papua New Guinea

Linear membership option calculates membership based on the linear transformation of the input raster and assigns a membership value of 0 at the minimum and a membership of 1 at the maximum. In forest management and decision making, there is a continuous need for high quality information on forest and the state of forest resources can be monitored by a form of map.

#### Land resources of the Morehead

Forest maps are effective tool for identifying the state of forest resources and monitoring ongoing spatial process in forested landscapes. The women focus group discussions have raised several concerns and recommendations with regard to increasing women participation in road construction activities. The proposed deforestation study area was further clipped from the bigger study area subset image Landsat-8 OLI was used for FCD model, which was clipped using area of interest AOI layer in ArcGIS software.

#### Land resources of the Vanimo Area, Papua New Guinea (1972 edition)

This massive increase is attributable to various strategies adopted by the project staff. The young even aged stands have low canopy shadow index SI compared to the mature natural forest stands. It is to these lands that the techniques of the CSIRO Division of Land Research may be said to apply more particularly.

#### Land resources of the Morehead

Vast amount of land and forest areas are being used for the purposes of development, resulting in an ever increasing decline of especially forest areas through the process of deforestation. Whether soils were allocated either to the great soil groups of a classification based on the 7th Approximation or to FAO soil units, an extremely wide range of soils occurred in each of the land units that could be distinguished on the basis of landform.

#### Gender in Road Construction: Experience in the Papua New Guinea Highlands

Currently, the Morobe Mining WGJV is doing some forward planning to clear some forest areas in the AEFSA areas prior to early works.

#### **Land resources of the Vanimo Area, Papua New Guinea (1972 edition)**

Locality map of the Wafi Golpu project site in the Morobe of Papua New Guinea. The paper presents several recommendations to strike a better gender balance in future road construction works.

#### **Gender in Road Construction: Experience in the Papua New Guinea Highlands**

Study Location and Its Description The Wafi-Golpu project is located in the Morobe Province of Papua New Guinea.
