**The Scientists: A History of Science Told Through the Lives of Its Greatest Inventors** by John Gribbin

**Harry Gold: Spy in the Lab**

It has often been said, and certainly not without justification, that the man of science is a poor philosopher.

**A leading man of the world**

Aside from the fact you would have to have one of the most brilliant minds to ever exist for such an idea to just pop into it, he had been working in this field and related areas for decades. We eat food that others have grown, wear clothes that others have made, live in houses that others have built.

**Albert Einstein Quotes**

His handler finally gave him an address in Albuquerque and a last name, Greenglass. About the author Department of Anthropology, University of Chicago, Chicago, IL 60637, USA By A Crack in Creation: Gene Editing and the Unthinkable Power to Control Evolution Jennifer A. It feels rushed and I think it would have been better to focus on the 16th to 18th centuries and leave it there.

**Science reads for the summer of '17**

Gribbin acknowledges which scientists came before or after others, those who lived and worked along side one another, those who were close friends, those who built on the ideas of others, and those who were great competitors. This proves that knowledge and justice are ranked above wealth and power by a large section of the human race. He could lose himself among the crucibles and test tubes and let his guard down.
