Torino: Giulio einaudi editore, 2003. Abstract: The HMG GG-C 14 was prepared by pre-swelling guar gum hydrophobic modification in alcohol-aqueous solution, the optical reactive condition was determined by studying the respective influence of each condition on the performance of the resultant product, and the final product possessed an apparent viscosity of 19957mPa·s the apparent viscosity of parent guar gum is 11764mPa·s and a substituting degree of 0.
