

# Remote sensing applications for consumptive use (evapotranspiration) - papers presented at 21st Annual AWRA Conference and Symposium, August 11-16, 1985, Tucson, Arizona

American Water Resources Association - Remote sensing applications for consumptive use (evapotranspiration)

Description: -

- Remote sensing -- Congresses.
- Evapotranspiration -- Congresses. Remote sensing applications for consumptive use (evapotranspiration) - papers presented at 21st Annual AWRA Conference and Symposium, August 11-16, 1985, Tucson, Arizona
- AWRA monograph series -- no. 6. Remote sensing applications for consumptive use (evapotranspiration) - papers presented at 21st Annual AWRA Conference and Symposium, August 11-16, 1985, Tucson, Arizona

Notes: Includes bibliographical references.  
This edition was published in 1986

Filesize: 8.107 MB

## Hydrological Modelling in Arid and Semi

Such technological transitions have always been accompanied by changes and disruptions in the nature of work, even if they lead to an overall reduction in working hours and an increase in unobligated time. KINEROS2 may be used to evaluate the effects of various artificial features such as urban developments, detention reservoirs, circular conduits, or lined channels on flood hydrographs and sediment yield.

## Our Common Journey: A Transition Toward Sustainability

Southern African FRIEND — the application of rainfall/runoff models in the SADC region.

## Remote sensing applications for consumptive use (evapotranspiration)

Distribution, posting, or copying is strictly prohibited without written permission of the NAP.

## Remote Sensing Applications: Society and Environment

Leaving slash in place may have offered some protection from animals, but did not allow as many suckers to become established and, therefore, may have been detrimental.

## Remote Sensing Applications: Society and Environment

Knowledge of number and location of such wells is limited, and in most instances, might be gained only by a field survey.

### **Environmental Health Mission Area Bibliography**

Identifying their presence is a relatively simple matter using remote-sensing approaches. This is a healthy situation because it means we are thinking about our objectives and making decisions to direct our course.
