We have no authority to amend the statutory language or add provisions that simply are not there. The bird tries to maintain its body temperature by burning its energy reserves stored as body fat, but these are soon exhausted. The Atlantic Cod shares some of its physical features with the two other species of its genus, or group of species, named Gadus.

Oil-sick birds make their way to shore and hide amongst rocks, logs, and natural debris. The Service has provided three opportunities to submit comments through the scoping notice, the proposed rulemaking, and the publication of the draft EIS. The commenters suggested that these later congressional interpretations should be given great weight and that failure to include incidental take within the scope of the statute would virtually nullify these amendments.
