Our history

Sebia also unveiled its kit, designed for the separation and measurement of HbA1c glycated fraction of hemoglobin A0 in human blood by capillary electrophoresis. This new instrument allows whole blood analysis from the primary tube for hemoglobin electrophoresis with no pre-analytical preparation, a true innovation for testing.

Our history

With HYDRASYS 2, Sebia offers an unrivalled range of electrophoresis solutions.

Our history

It provides a high throughput method with clear-cut and precise results.

Our history

CAPILLARYS was a new generation capillary electrophoresis system adapted for clinical laboratories allowing complete automation of the technique. The acknowledged analytical performances, as well as the added value of the HbA1c clear-cut and precise separation by electrophoresis, allowed Sebia to very rapidly become a significant player in the market worldwide. Since 2001: The company's development has been particularly strong in the field of capillary electrophoresis with the introduction of new tests including , protein immunotyping, quantification of CDT detection and monitoring for and HbA1c measurement for monitoring.

Our history

. The Sebia method is NGSP certified and IFCC standardized for use with the Sebia instrument.

Our history

With its integrated barcode reading, it ensures full traceability of the samples along with high throughput analysis. HYDRASYS 2 carries out all the

different phases of electrophoresis testing, from sample application to the final reading. .
