Enthusiast Auto Group

Maybe you just want to remove a portion of a design to make a pocket topper; whether the changes are large or small, Enthusiast gives you the tools to make your designs stitch the way you want them to. You can select stitches in any design using Lasso and similar tools, allowing you to move, delete, copy, paste, split, rotate, and more.

Enthusiast Auto Group

When sewing on terry or any fabric with loops and nap, generally a topping stabilizer is used. If this is you, you might be an Enthusiast.

ENTHUSIAST

What if I already have an Embrilliance Platform Program? Select an element, move, remove, rotate, copy, paste, recolor and re-use any part of your design, any way you like! There are controls where you can add or remove up to 25% of the stitches by increasing or decreasing the density of the selected items. The synonyms have been arranged depending on the number of charachters so that they're easy to find. The three buttons above control the display of the x-axis position of the design.

Enthusiast

You can precisely position embroidery designs using these buttons. But with Embrilliance Enthusiast, a basting stitch can be added to the hoop, which allows for a layer of topping stabilizer to be basted in place before any designs are sewn. There will also be a list of synonyms for your answer.

Enthuzst

To choose a hoop, click the preferences button on the toolbar, and the Hoops window will appear: Many built-in multiple position hoops pre-loaded.

ENTHUSIAST

If your word has any anagrams, they'll be listed too along with a definition for the word if we have one. If you want to adjust the color visually, use the HSV Hue, Saturation, Value sliders until you get a color that you like.

Enthusiast

Split AUTOMATICALLY using our patented feature. These can be helpful, but have a limitation: They do not hold down the nap after the design is stitched and the item is washed, which means outlines can be lost in the surrounding fabric. How do I install my program? Baste Hoop With, individually selected embroidery designs can have a basting stitch added automatically.
