COLLECTED IN AL

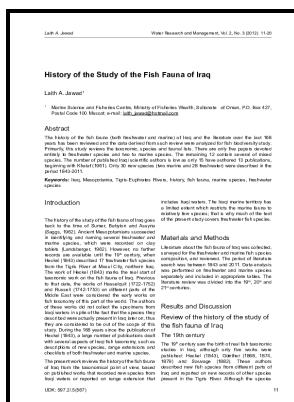

Although, Clark and Lanigan 1993 highlighted that the RAPD technique is less laborious compared with other fingerprinting techniques, producing results with low statistical error. The Tetrapoda way down in the lower right of the cladogram are the terrestrial vertebrates, and include most of the creatures you are familiar with: , reptiles, , , and.

The Dissection of Vertebrates

These are the lampreys and hagfish.

Table 1 from On the helminth fauna of some Iraqi reptiles.

They were collected from the original location and the same vertebrate host but in a different vector.
