Institutional goals must be upheld including safety and security of staff; however, the prisoners need to have some agency over their abilities to decide and try to change or resist control.

**Canadian Criminology in Action**

Other criminological research suggests that the numbers of inmates incarcerated and the length of time they serve does little to reduce crime, that the preponderance of persons from lower socioeconomic groups in prison creates cynicism about social justice, and that the offences of those in higher socioeconomic brackets are much more damaging to society than those committed by persons in lower socioeconomic brackets, but this

research has had little influence on government policy. The contributions in this book provide a solid foundation of knowledge about theories of crime causation and measurement of crime, social control institutions, and criminological research. Criminology: A Canadian Perspective provides students with basic background information about crime as well as a clear understanding of all the major theories of criminology, including biological, sociological, and psychological explanations.

This should not only be the truth about feminism, but also about the social space we all co-create together to talk about these issues. As Canadians, we differ from Americans and we should address the systemic issue of why crime occurs rather than allowing individuals to take matters into their own hands.
