American Medical Association Family Medical Guide / Edition 4 by American Medical Association

The types of qualified medical and family purposes also include adoption, pregnancy, foster care placement, family or personal illness, or military leave. Therefore, if an employee needs 10 weeks to care for a parent with a serious health condition, the 10 weeks are counted against both OFLA and FMLA leave entitlements, and the employee has two weeks of leave left in the year. Example: OFLA includes parents-in-law in its definition of family members, but FMLA does not.

Employment Law Guide

To be eligible for FMLA leave, employees must have worked for the employer for at least 12 months not necessarily consecutive , and have worked at least 1,250 hours during the 12-month period immediately preceding the leave.

The American Medical Association Family Medical Guide Third Edition

OFLA states that an employee returning from leave is entitled to the former job, or to an available equivalent job if the former job has been eliminated.
