A comparative study of adult developmental patterns of RN and generic students in a baccalaureate nursing program

They tried to find out the reasons behind the educational practices of the country visited by them and they became more careful in transplanting the educational practices of another country to their own. These concepts support the deconstruction of the dualism between national and international perspectives, emphasising the interwoven perspective of influences of different contexts on a phenomenon.

A comparative study of adult developmental patterns of RN and generic students in a baccalaureate nursing program

Comparisons in international groups provide new insights into other countries and into new aspects and variations of new models. The development of a joint module can build on these structures, which ensures the formal and legal basis for the joint activity.

A Comparative Study of Learning Characteristics of RN and Generic Students

This does not mean that smooth administrative ways for implementing the joint module into local curricula are already in place. With regard to the pragmatic dimension, comparative educators have studied other societies to learn what works well and why.

The Development of Comparative Education Example

This seminar was offered for adult education students at the universities of Duisburg-Essen and Mainz both in Germany.

Three importance Stages in the development of comparative education

In the form of superior journalism, this style of work remains a prominent feature of writing on foreign countries today.

ERIC

J Allied Health, 10, 28-34. This need is especially evident in explicitly internationally oriented fields in adult and continuing education. Such reports

were essentially the work of amateurs who included in more general descriptions of institutions and practices abroad details of foreign ways of raising children.
