Nominal Gross Capital Formation for Ethiopia (ETHNIGDPPT)

As explained above, voluntary savings depend upon the power to save and the will to save of the people. The stock market facilitate the purchase of shares while the bond market provides a means by which to sell and trade bonds in the secondary market to enable participating governments, institutions and companies raise long term capital.

Ethiopia

A certain measure of deficit financing, however, can be had without creating such pressures. This was unattractive to the private sector because 57 percent of government debt was purchased by the state owned commercial banks. These figures provide a strong case for a potential and need for establishing a domestic debt market in Ethiopia.

NBE board approves primary market directive

While longer term maturing duration debt must yield high interest rate, and can increase the funding cost.

Nominal Gross Capital Formation for Ethiopia (ETHNIGDPPT)

Deficit financing is, therefore, the method on which the government can fall back to obtain funds. Units: Percent of GDP, Not Seasonally Adjusted Frequency: Annual Notes: Annual data observations begin 8 years before the year of publication.

Public External Debt, Capital formation and Economic growth in Ethiopia

However, without the secondary market, the bond holders cannot redeem or cash out its investment before the bond maturity date. Mobilization of Savings: The next step in the process of capital formation is that the savings of the households must be mobilized and transferred to businessmen or entrepreneurs who require them for investment.
