

# Research process in nursing

## Van Nostrand - Citation: The research process in nursing

Model (authors)	Model 1 (Adams and Taylor 2014)	Model 2 (Macle and Goodman 2013)	Model 3 (Lucy 2000)	Model 4 (adapted from Lucy 2000)
Stages				
Tier 1: Recognise and clarify the problem.	Developing research questions.	Developing the research question.	Developing the research question.	Developing the research question.
Tier 2: Discuss and plan the study.	Literature searching.	Searching and evaluating the literature.	Searching and evaluating the literature.	Searching and evaluating the literature.
Tier 3: Define the research question and select appropriate methodology.	Literature reviewing.	Choosing research design.	Choice of methodology and research design.	Selecting the research approach.
Tier 4: Refine the methodology.	Ethical considerations.		Preparing a research proposal.	Selecting research methods.
Tier 5: Disseminate the findings.	Sampling.		Gaining access to the data.	Gaining access to the research site and data.
	Data collection.		Pilot study.	Pilot study.
	Data analysis.		Data collection.	Data collection.
	Interpretation and implications of the research.		Data analysis.	Data analysis.
	Using research in practice.		Dissemination of results.	Dissemination of results and implementation of findings.
			Implementation of the research.

### Using Evidence

This makes qualitative research particularly useful when little is known about a phenomenon because the research helps identify key concepts and constructs.

### Using Evidence

The specific nursing practice that will be changed, in addition to the practice context, will determine the types of data included for review.

### 7 Steps of the Research Process

Information from nursing research has the potential to directly impact the care provided to patients in all health care settings.

### Stages in the research process

Many qualitative research designs are used in nursing. Edited by Kate Gerrish and Judith Lathlean, 7th ed. The Research Process in Nursing.

### Nursing research

Sampling approaches Sampling approaches depend on the qualitative research design selected. Thorne argues that saturation is a concept appropriate for grounded theory studies and not other study types.
