**Alternative fuels: Emissions, Economics, and performance (Book)**

For non-energy co-products produced in specific systems, economic allocation was deemed appropriate as it is subject to fewer methodological and circumstantial choices than the displacement method. Biofuels that are compatible with existing infrastructure and internal combustion engine vehicles ICEVs for petroleum-based fuels. The current and possible future US and European ECA zones are plotted in Fig.

#### **Emissions of Nitrous Oxide and Methane from Conventional and Alternative Fuel Motor Vehicles**

Infrastructure and Vehicle Availability A variety of new, heavy-duty natural gas vehicles are available from U.

#### **Emissions of Nitrous Oxide and Methane from Conventional and Alternative Fuel Motor Vehicles**

Techno-Economic Analysis of Biomass Fast Pyrolysis to Transportation Fuels. In this study, RJF was assumed to be consumed in the US.

#### **Economic evaluation of alternative technologies to mitigate Sulphur emissions in maritime container transport from both the vessel owner and shipper perspective**

The goal of this research is twofold: first, to discover alternative available technologies to mitigate Sulphur emissions according to the literature; second, to evaluate economically the selected technologies both from vessel owners and shippers perspectives. Land requirements are scaled from the U. The major petroleum pipelines between the Gulf Coast and the Northeast and North Central United States bisect these regions.

#### **Alternative fuels: Emissions, Economics, and performance (Book)**

The AEO projections suggest that natural gas will indeed be most attractive for electric power generation because of its low leveled cost.

#### **3 Alternative Fuels**

Therefore, CCS was not included in GTL facilities for the purpose of this study. Biofuel Policy NRC, 2011 and the references cited therein form the bases for the discussion of economics in this chapter.

#### **Alternative Fuels: Emissions, Economics, and Performance**

The book is also an ideal introduction to this topic for legislators, administrators, educators, and anyone interested in learning more about alternate fuels.
