## Fetal and Neonatal Surgery

Symptoms of dysmotility correlate with reduced intrinsic innervation e.

## Newborn Surgery

However, not all murmurs are signs of congenital heart defects.

## Newborn Surgery

Food is given through a small tube that's placed through the nose and into the stomach. The anesthesiologist must understand the anatomic and physiologic issues to provide anesthesia to these patients for a noncardiac operation.

## Cataract surgery for infants and children

Fetal Surgery Fetal surgery is performed on babies while still developing in the womb. Children recover well from these procedures and lead normal, healthy lives. The most recent trend for the repair of HD is mini-invasive primary surgery.

## Clinical Guidelines (Nursing) : Neonatal Fecal Stoma Care

The defect allows oxygen-rich blood from the left ventricle to mix with oxygen-poor blood in the right ventricle.
