Everything in business begins and ends with leadership. And because it's a complex topic, no one expert has a complete formula for success.

Therefore, here are five important bodies of knowledge for those who are trying to sharpen their leadership skills. All have been developed by true students and teachers of leadership. Master these lessons and you will be well on your way to success.

In a future column I'll look at a similar set of skills and attributes of effective management. Though leadership and management are related, they are two sides of the same coin – and a person tends to be strong in one vs. the other.

**Trust and Team Health**

Pat Lencioni, author of the classic *Five Dysfunctions of a Team* and his latest *The Advantage*, emphasizes the importance of team health. There are plenty of smart teams that have failed in turn, a healthy team is more likely to succeed. A leader must be able to make right decisions and be able to align and execute on a common vision.

Lencioni outlines five dysfunctions that damage team health, each impacting the others in a cascade of challenges:

- Absence of Trust—willing to be vulnerable within the group
- Fear of Conflict—seeking harmony over constructive and productive debate

### What Is Leadership?

As Suzie rushes down the hall to the conference room, she feels guilty. You are not made a leader by your job title, you are made a leader by your influence.

### 5 Key Elements that Define Effective Leadership

She already felt guilty and had apologized to everyone. The effectiveness of a given pattern of leader behavior can be dependent upon demands imposed by the situation. They have a goal that they can unite a team around and a plan to help them get there.
