Furthermore, features may be constituents of other features. Geo-Metrics III is a guide and reference for anyone involved in engineering design, drafting, manufacturing, quality and verification of product.

The other two datum targets are datum target areas, each of which is represented by a cross-hatched circular area.

Constrained dimensioning and tolerancing assistance for mechanisms

Lastly, the compartment for the tertiary datum if it exists is immediately to the right of the compartment for the secondary datum.

A Conceptual Data Model of Datum Systems

Covers are intact but may be repaired. However, the DSCDM has several constraints that ensure that the datums of the datum system have a valid precedence value assigned to them. In order to interpret the data populations presented in the tables below, it is necessary to know which values correspond to which attributes.
