**This page is specifically for Test Purposes**

This service provides a subset of the database comprised of those data fields deemed most useful and which most frequently contain some information, but full reports of most records are available as well.

**USGS Library**

Or, you can report corrections just by sending a message to. USGS Water data is publicly available from their National Water Information System database. These maps are bounded by two lines of longitude and two lines of latitude.

## **Overview**

The NEIC in on the campus of the detects the location and magnitude of global earthquakes. Real-time streamflow data are available online.

### **The U.S. Geological Survey Library**

Available online at Heywood, C. Established in 1879, to build and organize a collection of scientific materials in the earth sciences, the U. However, in this series, the lines of latitude are spaced 30 minutes apart and the lines of longitude are spaced 60 minutes, which is the source of another name for these maps; the 30 x 60-minute quadrangle series.
