**Shaul : Hochschild cohomology commutes with adic completion**

Unfortunately, the group  $U_k$  may be trivial e. Production tubing may be manufactured using various grades of alloys to achieve specific hardness, corrosion resistance or tensile strength requirements.

**CiteSeerX — Search Results — Calculating Group Cohomology: Tests for Completion.**

If  $X$  is a noncompact manifold, then a closed submanifold not necessarily compact determines a cohomology class on  $X$ .

**Weak completions, bornologies and rigid cohomology**

In both cases, the cup product can again be described in terms of intersections of submanifolds.

**Completion (oil and gas wells)**

In these terms, the cup product describes the intersection of submanifolds. The aim of the present monograph is a thorough study of the adic-completion, its left derived functors and their relations to the local cohomology functors, as well as several completeness criteria, related questions and various dualities formulas.
