## Palm tree

The Queen of Sheba took Dates with her on the journey to meet King Solomon, a journey which initiated the intense and richly rewarding trade of Myrrh and Frankincense. The hastula a triangular protuberance of the petiole at the base of the blade prominently extends over the leaf base of the blade. It has unique characteristics that enable it to thrive in sand without being aranaceous and to grow well where water is close to the surface without being aquatic.
