### Amazing Insects of the World

The colored hind wings, which are normally hidden when the grasshopper is at rest, can also be flashed to deter potential predators. The larvae inside the caterpillars survive by feeding on the bodily fluids of their host. However, this marvelous insect also goes by the alternate common name of the Zulu Hud Bug.

### Amazing Insects Archives

They have super strong mandibles jaws that can easily slice a pencil in half! Still, you can survive it, and many people do. Presented in stunning full-color photographs, the book showcases a range of insects, including the , which has eyes at the ends of its long, protruding, antler-like stalks, the bright yellow-and-black and the metallic.

### The world's 20 most incredible insects

Their wing can reach up to 3.

### 10 Insects with Amazing Superpowers

Some katydids can be as big as or even bigger than your hand! Instead, studies show bugs face an array of threats, including habitat destruction and fragmentation, climate change, , urbanization, and light pollution.
