## Construction Waste Management

Salvage: Recovery of components, products, or materials for the purpose of reusing them for the same or similar purposes as their original use. HeavyJob implementation can be done either in-person, with two to three days of planning at our Sugar Land, Texas, location and two days onsite at your company, or online using our trainers and the HCSS Academy.

## Construction Waste Management

Solid waste landfills in the US sited in arid regions will continue to receive significant volumes of waste generated in urban areas.

A

It also gives them more accountability to the field because project managers can see notes and estimated quantities, and they can provide feedback to help estimators improve estimates.

## Construction Waste Management

Recycling: Introducing a material into some process for remanufacture into a new product, which may be the same or similar product or a completely different type of product.

## Construction Waste Management

WBDG is a gateway to up-to-date information on integrated 'whole building' design techniques and technologies.
