The Time Machine (2002)

Returning to the site where he arrived, the Time Traveller is shocked to find his time machine missing and eventually concludes that it has been dragged by some unknown party into a nearby structure with heavy doors, locked from the inside, which resembles a Sphinx. As a result, these imperfections create tiny fluctuations in history and that is why the Time Patrol has Parallel Quests, so the Time Patrol can keep trying over and over again to fix history completely, but they only ever get a fraction closer to the correct version.

Time Machine

Luckily, he had removed the machine's levers before leaving it the time machine being unable to travel through time without them. Based on the classic sci-fi novel by H.

The Time Machine

Set in , Wells' text is viewed in modern times as a comment on the increasing and division of his era, which he projects as giving rise to separate human species: the fair Eloi and the savage Morlocks. It provides an interesting and adequate adaptation by prestigious screen-writer John Logan , co-producer too , who equally wrote the Eloi language.

It also retained the deleted ending from the novella as a recorded message sent back to Wells from the future by the traveller using a prototype of his machine, with the traveller escaping the anthropoid creatures to 30 million AD at the end of the universe before disappearing or dying there.

Time Machine

The Traveller escapes when a small fire he had left behind them to distract the Morlocks catches up to them as a forest fire; Weena and the pursuing Morlocks are lost in the fire and the Time Traveller is devastated over his loss.
