MBA Math Skills Every Business Student Needs

Assignable End-Of-Chapter Material Connect for Business Math helps students learn more efficiently by providing feedback and practice material when they need it, where they need it. Students can watch these videos in Connect.

Math

Graduating from the Mathematics Business and Accounting Program will provide you with many possible career options no matter what program or plan you graduate from. Real estate and property professionals also employ business mathematics often when calculating their commission, navigating the mortgage process, and managing taxes and fees upon closing a deal. Completing the last course in each sequence allows students to move up in the sequence or move into credit courses.

Basic Arithmetic Practice Tests

Scholarship recipients are notified in April and the scholarship awards are distributed in the next fall semester.

Business Mathematics

Students who plan to major in STEM fields, must follow the pathway beginning with MATH 30.
