**Protection of Forcibly Displaced**

## Populations

Saguling had many deep, sheltered bays very suitable for cage aquaculture Soemarwoto et al.

## Fisheries

Problems with this plan Only 2000 of the 20,000 displaced families took to this type of fishing as their primary occupation. To examine the disadvantages of integrated fisheries resource management system

## Protection of Forcibly Displaced Populations

This pilot project, was funded by the National Mission for Protein Supplement Scheme.

## Culture

The special knowledge they have. He evinced surprise of it and the natives said it was made by black fellows for catching eels when the big water came and was by them called yere.

## Hydropower Generation and Its Related Impacts on Aquatic Life (Fisheries)

Rapid urbanization has increased the need to preserve and intensify agricultural production on the remaining agricultural areas, and to find innovative ways to conduct intensification sustainably, without further environmental and social damage. The activity has grown significantly due to the rapid increase in fish demand and markets, not only for local consumption but also in the Province of West Java, Jakarta, and in some cities on

the island of Sumatra, such as Bandar Lampung and Palembang. It's hard to tell whether he truly believes his words or if he is saying it out of a lack of option.
