Men and Women Tend to Marry Within Their Class

Chinese Journal of School Health 39 2 : 252—255. Life is too damn short.

Children of the reform and opening

Income, again, had an effect, but access to a large friendship base was more important, especially to rural subjects. Although some studies emphasize the possibility of selection effects, suggesting that individuals in better health are more likely to be married , most researchers emphasize two theoretical models to explain why marital relationships shape well-being: the marital resource model and the stress model ; Few of those who spoke to The Economist were willing to talk about politics.

Economic correlates of footbinding: Implications for the importance of Chinese daughters' labor

Journal Information Since its foundation in 1974, Social Indicators Research has become regarded as the leading journal for the publication of the results of research dealing with problems related to the measurement of all aspects of the quality of life. More generally, Monnott finds that individuals who value extrinsic motives, such as, having fame, high income and possessions, exhibit lower levels of job satisfaction, life satisfaction, and feelings of accomplishment. Similar to other family relationships, sibling relationships can be characterized by both positive and negative aspects that may affect elements of the stress process, providing both resources and stressors that influence well-being.

Women and the Progressive Movement

The equity build-up associated with owning a house often is not worth as much as the extra money saved and re-invested whilst living in an apartment — even if you live in the home long-term. Several of the contributors take advantage of these datasets. Footbinding, Industrialization, and Evolutionary Explanation: An Empirical Illustration of Niche Construction and Social Inheritance.

Motherhood in Bondage

Not all the time of course but do some research on the topic before you shoot the messenger. In addition, instead of arguing that tradition is an obstacle to development, the new modernization studies attempt to show the beneficial role of tradition such as familism and folk religion. Poverty and marital behavior of young women.

Motherhood in Bondage

Studies have examined various aspects of the wellbeing of the urban populace Appleton and Song ; Cheng et al. These different attitudes towards relationships, marriage, and sexuality often cause conflicts among different generations.
