

# Study guide - College physical science

## Prentice-Hall - Programs of Study

**Physical Science Study Guide**

Students need to be able to:

- \* explain that matter has different states and that each state has distinct physical properties
- \* describe objects by their properties or the materials from which they are made and use these properties to separate or sort a group of objects
- \* identify "what is" a physical change and "what is not" given different examples
- \* support their choices by identifying the different characteristics needed for a physical change to occur
- \* identify "what is" a chemical change and "what is not" given different examples
- \* support their choices by identifying the different characteristics needed for a chemical change to occur

**Notes**

Matter is anything that has mass and takes up space.  
Matter can be solid, liquid, or gas.

| Solids  | Liquids  | Gases  |
