Business continuity planning for a pandemic

Employees in high risk occupations may have heightened concern about their own safety and possible implications for their family. Visit the for a list of hardship contacts for each bank. As of February 2007, the spread of H5N1 virus from person to person has been limited to rare, sporadic cases.

Business Continuity: Preparing for a Global Crisis

HR must balance the needs of people with the need to keep business operations running. The second and equally important role of the command center is to provide comfort and confidence to the employees and customers that the company is on top of the situation, treating the situation with importance, and protecting the business and safety of the employees. Additional respirator and surgical mask guidance for healthcare workers has been developed and is available at.

How to Prepare for Business Continuity and Plan for Recovery During the Coronavirus (COVID)

It also makes sense to add a page on your website where customers can see how you will serve them during this situation, how your products and services might help them as the business environment changes, as well as access to helpful information and resources.

How to plan for a post

The occupational use of respirators, including those purchased at home improvement or convenience stores, are still covered by OSHA's Respiratory Protection standard.

How to Prepare for Business Continuity and Plan for Recovery During the Coronavirus (COVID)

For more information on CDC's web notification policies, see.

Communications for pandemic risk planning

Highly pathogenic H5N1 is one of the few avian influenza viruses to have crossed the species barrier to infect humans and it is the most deadly of those that have crossed the barrier.
